EDUCATION

Queen's University

Kingston, Ontario

Bachelor of Computing (Honours) – Specialization in Software Design

Sept. 2020 – Apr. 2024

- Academic Excellence Scholarship
- Dean's Honour List with Distinction
- Dean's Award of Excellence

EXPERIENCE

Senior Full-Stack Software Developer

Mar. 2026 – Present

Royal Bank of Canada – Borealis AI

Toronto, ON

- Taking increased ownership of architectural decisions and database design across the team's AI product suite.
- Communicating directly with stakeholders to align technical direction with business requirements.

Full-Stack Software Developer

May 2024 – Mar. 2026

Royal Bank of Canada – Borealis AI

Toronto, ON

- Built and maintained full stack internal AI products for use across the bank, working across Vue.js, React, Angular, and Python backends.
- Worked with data engineers on API contracts to effectively surface AI-generated insights, summaries, and recommendations in production applications.
- Collaborated with ML research teams on prompt optimization and agent output refinement to align model responses with frontend and product requirements.
- Maintained CI/CD pipelines and deployments using OpenShift and GitHub Actions to ensure reliable, compliant production releases.

Full-Stack Software Developer Co-op

May 2023 – Aug. 2023

Royal Bank of Canada – Data and Analytics

Toronto, ON

- Contributed to one of the bank's largest internal platforms for data distribution using React, Angular, Node.js, Flask, PostgreSQL, and C#.
- Created crucial design system components to improve developer experience and speed up future development.
- Won a business case competition by automating the operational committee's scheduling process and participated in implementing the solution.

Software Developer Co-op – RBC Amplify

May 2022 – Aug. 2022

Royal Bank of Canada

Toronto, ON

- Developed an ML application using React, Flask, S3, and TensorFlow/PyTorch to predict application errors through error log analysis.
- Conducted user research alongside Site Reliability Engineers and subject matter experts.
- Filed a patent for the data pre-processing of application-level error logs.
